Summary of NEM Charges

Electric Minimum Charges

To stay connected to the grid and transfer energy to and from your home, the utility charges a base rate each month. This charge will not affect your monthly bill but instead will be reflected on your annual True-Up bill.

Explanation of Calculations

Your YTD Total NEM Charges represent the balance of your net usage since the start of your True-Up period. Charges are calculated each month but are not billed until the end of the True-Up period.

Your Summary of NEM Charges will be reset to zero at True-Up.

You may be eligible for Net Surplus Compensation (NSC) at True-Up only if your **Net Usage (kWh)** is negative. Your NSC is calculated at True-Up based on that month's market prices.

At the end of the True-Up period, you will be billed for any YTD NEM balance in addition to any applicable charges and taxes.

This is your YTD balance. Your total NEM balance will be reconciled on your True-Up statement (mm/yyyy).

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up.

NEM Charts

These charts supply a visual insight into your NEM charges and credits month over month. These balances are not due each month and instead are totaled then charged on your True-Up bill.
